11. Evaluation of technical and financial proposal

11.1. PHASE I – TECHNICAL PROPOSAL (70 points)

11.1.1. Only proponents meeting the mandatory criteria will advance to the technical evaluation in which a maximum possible 70 points may be determined. Technical evaluators who are members of a Committee for Partners’ Assessment (CPA) appointed by UNWOMEN will carry out the technical evaluation applying the evaluation criteria and point ratings as listed below. In order to advance beyond Phase I of the detailed evaluation process to Phase II (financial evaluation) a proposal must have achieved a minimum cumulative technical score of 50 points.

	Technical description and appropriateness/adequacy of approach / service	40 points
	Relevance and technical capacity: (See Capacity Assessment Checklist) <ul style="list-style-type: none"> proposed staffing (number and expertise) for the services to be delivered; organizational experience and proven track record/credibility on gender and development, RBM and its application to key processes (e.g., planning, programming, monitoring, reporting and evaluation), and other areas of expertise relevant to the services required relevant experience in partnerships with UN Women, other UN agencies, governments, NGOs, and other development actors 	15 points

11.2.1. Financial proposals will be evaluated following completion of the technical evaluation. The proponent with the lowest evaluated cost will be awarded 30 points. Other financial proposals will receive pro-rated points based on the relationship of the proponents’ prices to that of the lowest evaluated cost

Formula for computing points:
Points = (A/B) Financial Points

Example: Proponent A’s price is the lowest at \$10.00. Proponent A receives 30 points.
Proponent B’s price is \$20.00. Proponent B receives $(\$10.00/\$20.00) \times 30$ points = 15 points

12.2 Proponent's proposal must be organized to follow the format of this CFP. Each proponent must respond to every stated request or requirement and indicate that proponent understands and confirms acceptance of UNWOMEN stated requirements. The proponent should identify any substantive assumption made in preparing its proposal. The deferral of a response to a question or issue to the contract negotiation stage is not acceptable. Any item not specifically addressed in the proponent's proposal will be deemed as accepted by the proponent. The terms "proponent" and "contractor" refer to those organizations that submit a proposal pursuant to this CFP.

12.3 Where the proponent is presented with a requirement or asked to use a specific approach, the proponent must not only state its acceptance, but also describe, where appropriate, how it intends to comply. If the proponent wishes to propose alternatives or equivalents, the proponent must demonstrate that any such proposed change is equivalent or superior to UNWOMEN established requirements. Acceptance of such changes is at the sole discretion of UNWOMEN.

Section 4: UN Women Terms of Reference

1. Description of required services/results

The Call for Proposal focuses on the following outcome and outputs:

1. Introduction

a. Background/Context for required services/results

In Pakistan, estimates of the number of persons living with disabilities vary between 3.3m and 27m¹, of which almost 70% of women with disabilities live in rural areas. Convention on the Rights of Persons with Disabilities (CRPD) was adopted in 2008 and ratified in 2011 by Pakistan, stressing the importance for their equal participation in society, and removing barriers to their inclusion.

Globally, and in Pakistan, policy approaches to disability have largely been focused on rehabilitation, welfare and charity. The UNPRPD (United Nations Partnership on the Rights of Persons with Disabilities) Moving from Charity model to Rights based work – Delivering as ONE for Empowerment of Women with Disabilities Project aims to interlink three distinct influencers, namely, the civil society and disabled persons organizations (DPO) movement with the UN system that in turn link with government enablers.

The project intervention will necessitate working with the Ministry of Human Rights (MoHR) and other national and provincial departments on reporting and tightening legislation through the refinement of Disabled Persons Act. This will be done at relevant national and provincial forums, while garnering the support from women parliamentarians as well as through media campaigns to strengthen national discourse around rights of women with disabilities.

The project will also support policy formulation across the project districts for targeted action improving accessibility of workplaces and capacity building of employees and employers to ensure working environment is inclusive. Through various trainings, technical support, partnerships between recruitment services and employers, educational and vocational trainings and partnerships between DPOs, women with disabilities will gain the right to employment.

¹ The Economist; Intelligence Unit, Moving from the Margins; August 2014

Justification:

Pakistan made early attempts at including persons with disabilities in the 1980s with the introduction of education and employment policies. Though celebrated in the early years, they proved to be ineffective in mainstreaming rights for disabilities in systems and society. Persons with disabilities still have difficulty exercising their civil and political rights, attending quality schools and finding gainful employment.

Universally, and in Pakistan, policy approaches to disability have largely been focused on rehabilitation, welfare and charity. Pakistan ratified the treaty in 2011, which requires governments to collect statistical and research data to identify and address barriers faced by people with disability under the Convention (CRPD, Article 31), but work around disability in Pakistan is fragmented with social exclusion of PWDs within the development discourse is evident.

The project will aim to capitalize on linkages and influence ministries at federal and provincial levels to secure compliance and defend the rights of women with disabilities, build capacity, monitor and report milestones in meeting global commitments Women's Welfare Department (WWDs). In addition, the work will strengthen volunteerism among civil society and through levers of thematic priorities of enabling legislation and policy frameworks, empowering cultural norms, capable and inclusive institutions, access to services and assistive technology supported by evidence.

b. General Overview of services required/results

The approach of the project and its impact strategy relies on the substantive participation of DPOs, their engagement as leaders and advocates for change, their capacity strengthening and through them capacity development and mentoring of government, media, private sector, service providers, and law enforcement bodies. The main overview of services are:

1. Advocacy for integrating WWD concerns across the new UN Sustainable Development Framework (UNSDF)² for Pakistan and its interface with national and provincial government counterparts to report consistent progress towards the rights and inclusion of persons with disabilities.
2. Capacity enhancement with mapping of capacities of DPOs, as capacity to support the above work will be the bedrock of the project. Capacities of government and line departments engaged in meeting CRPD guidance will be mapped and built across two target provinces and their target district.
3. Working through existing national and provincial guidelines on dignified employment and placement of men and women with disabilities at work opportunities. UN Women and ILO will ensure employment placements providing women with disabilities with employable skills and protocols established for linkages to micro-finance opportunities. Best practices observed across both target provinces will be replicated.
4. Advocacy with the MoHR to ensure reports to the global CRPD committee on advance made for WWD in Pakistan.

Outcome1 Enhanced capacity of the relevant government entities to monitor and report on the rights of persons with disabilities.

² The Government of Pakistan and the United Nations in Pakistan signed the UN Sustainable Development Framework (UNSDF), also known as the One Programme III (OP III) 2018-2022

Outcome 2 Enhanced capacities of stakeholders to increase employment for women with disabilities

4.1 Identify how best to train to National Security Forces on WWD and Violence Against Women
4.1.2 ☐ Seminar with NCSW on Women with Disabilities (WwD), especially Intellectual and Mental disabilities, to develop recommendations and way forward on their rights and protection
In addition, the focus will be to ensure and encourage coordination as well as learning and sharing of good practices, through leveraging partnership with the non-traditional actors such as the private/corporate sector, alliances, religious leaders, vocational institutions, and academia in order to change mind-sets and enhancing results of the Program. Through this initiative, UN Women in Pakistan aims to ensure effective programme administration in collaboration with the government, CSOs and academia via its physical presence in two target provinces (Sindh and Khyber Pakhtunkhwa) to address issues of women’s empowerment and gender equality at the provincial and district level.

ANNEX B2 – Technical Proposal Guidance TEMPLATE

Mandatory requirements/pre-qualification criteria

Proponents are requested to complete form Annex B1-2 and return it as part of their submission. Proponents must meet all mandatory requirements/pre-qualification criteria as set out in Annex B1-2. See section 3 (clause 10) below for further explanation. Proponents will receive a pass/fail rating on this section. To be considered, proponents must meet all the mandatory criteria described in Annex B1. UN WOMEN reserves the right to verify any information contained in proponent's response or to request additional information after the proposal is received. Incomplete or inadequate responses, lack of response or misrepresentation in responding to any questions will result in disqualification.

Component 1: Organizational Background and Capacity to implement activities to achieve planned results (max 1.5 pages)

This section should provide an overview with relevant annexes that clearly demonstrate that the proposing organization has the capacity and commitment to implement successfully the proposed activities and produce results. Key elements to be covered in this section include:

1. Nature of the proposing organization – Is it a community-based organization, national or sub-national NGO, research or training institution, etc.?
2. Overall mission, purpose, and core programmes/services of the organization
3. Target population groups (women, indigenous peoples, youth, etc.)
4. Organizational approach (philosophy) - how does the organization deliver its projects, e.g., gender-sensitive, rights-based, etc.
5. Length of existence and relevant experience
6. Overview of organizational capacity relevant to the proposed engagement with UN Women
(e.g., technical, governance and management, and financial and administrative management)

Component 2: Expected Results and Indicators (max 1.5 pages)

This section should articulate the proponent's understanding of the UN Women Terms of Reference (TOR). It should contain a clear and specific statement of what the proposal will accomplish in relation to the UN Women TOR. This should include:

- The **problem statement** or challenges to be addressed given the context described in the TOR.
- The specific **results** expected (e.g., outputs) through engagement of the proponent. The expected results are the measurable changes which will have occurred by the end of the planned intervention. If not provided in the TOR, the expected results should have corresponding indicators, baselines and targets. Propose specific and measurable indicators which will form the basis for monitoring and evaluation. These indicators will be refined, and will form an important part of the agreement between the proposing organization and UNWOMEN.

Component 3: Description of the Technical Approach and Activities (max 2.5 pages)

This section should describe the technical approach and should be able to show the soundness and adequacy of the proposed approach, what will actually be done to produce the expected results in terms of activities. There should be a clear and direct linkage between the activities and the results at least at the output level. Specific strategies should also be described to support the achievement of results, such as building partnerships, etc.

Activity descriptions should be as specific as necessary, identifying **what** will be done, **who** will do it, **when** it will be done (beginning, duration, completion), and **where** it will be done. In describing the activities, an indication should be made regarding the organizations and individuals involved in or benefiting from the activity.

This narrative is to be complemented by a tabular presentation that will serve as Implementation Plan, as described in Component 4

Component 4: Implementation Plan (max 1.5 pages)

This section is presented in tabular form and can be attached as an Annex. It should indicate the **sequence of all major activities and timeframe (duration)**. Provide as much detail as necessary. The Implementation Plan should show a logical flow of activities. Please include in the Implementation Plan all required milestone reports and monitoring reviews.

Monitoring and Evaluation Plan (max. 1 page)

This section should contain an explanation of the plan for monitoring and evaluating the activities, both during its implementation (formative) and at completion (summative). Key elements to be included are:

- How the performance of the activities will be tracked in terms of achievement of the steps and milestones set forth in the Implementation Plan
- How any mid-course correction and adjustment of the design and plans will be facilitated on the basis of feedback received
- How the participation of community members in the monitoring and evaluation processes will be achieved

Component 5: Risks to Successful Implementation (1 page)

Identify and list any major risk factors that could result in the activities not producing the expected results. These should include both internal factors (for example, the technology involved fails to work as projected) and external factors (for example, significant currency fluctuations resulting into changes in the economics of the activity). Describe how such risks are to be mitigated.

Include in this section also the key **assumptions** on which the activity plan is based on. In this case, the assumptions are mostly related to external factors (for example, government environmental policy remaining stable) which are anticipated in planning, and on which the feasibility of the activities depend

Component 6: Results-Based Budget (max. 1.5 pages)

The development and management of a realistic budget is an important part of developing and implementing successful activities. Careful attention to issues of financial management and integrity will enhance the effectiveness and impact. The following important principles should be kept in mind in preparing a project budget:

- Include only costs which directly relate to efficiently carrying out the activities and producing the results which are set forth in the proposal. Other associated costs should be funded from other sources.
- The budget should be realistic. Find out what planned activities will actually cost, and do not assume that you will be able to make do for less.
- The budget should include all costs associated with managing and administering the activity. Particularly include the cost of monitoring and evaluation.
- Indirect costs, or administrative overhead costs, such as staff salaries and office rent are not funded. These therefore should not be part of the funding request.
- The budget line items are general categories intended to assist in thinking through where money will be spent. If a planned expenditure does not appear to fit in any of the standard line item categories, list the item under other costs, and state what the money is to be used for.
- The figures contained in the Budget Sheet should agree with those on the proposal header and text.
